

CS156 (Introduction to AI), Fall 2021

Homework 3 submission

Roster Name: Nand Kishore Khuswaha

Student ID: 013920192

Email address: nandkishore.khuswaha@sjsu.edu
(<mailto:nandkishore.khuswaha@sjsu.edu>)

Any special notes or anything you would like to communicate to me about this homework submission goes in here.

References and sources

List all your references and sources here. This includes all sites/discussion boards/blogs/posts/etc. where you grabbed some code examples.

1) Regression.Boston (Example class file)

Solution

Load libraries and set random number generator seed

```
In [1]: import numpy as np
import pandas as pd
import matplotlib.pyplot as plt
import seaborn as sns
from sklearn.model_selection import train_test_split
from sklearn import linear_model
from sklearn.metrics import mean_squared_error, mean_absolute_error, r2_score
```

```
In [2]: np.random.seed(42)
```

Code the solution

```
In [3]: datafile = pd.read_csv("/Users/becoming1/Desktop/homework3_input_data.csv")
```

```
In [4]: print(datafile)
```
